• Asthma	16.1%	11%	18%	26.1%	25%
• COPD	16.1%	6%	13%	7.0%	0%
• Congestive heart failure	20.6%	2%	12%	9.1%	13%
• Coronary artery disease	20.7%	3%	3%	8.4%	0%
• Chronic liver disease	16.9%	2%	16%	9.9%	13%
• Dementia	2.2%	0%	1%	0.9%	0%
• Traumatic Brain Injury	3.7%	2%	2%	2.6%	0%
• Obesity	23.2%	0%	23%	33.0%	38%
Comorbid Conditions					
Diabetes/hypertension	69.7%	3%	20%	13.6%	25%
Diabetes/SUD	61.4%	0%	10%	4.9%	0%
3 or more chronic conditions	64.0%	1%	45%	33.6%	50%

* Top utilizing members with an active case and care plan in the period.
**Percent of members active in complex care management and complex level = 3 or 4.
***The change in MDD is due to a modified methodology to align with ICD10 code list.

Definitions:

Top 3% – The top 3% of utilization is measured by the total sum of both inpatient and emergency department (ED) claims.

Homelessness – Defined by diagnosis code ICD 10 Z590 and "Homeless" is listed as the member address.

Data Parameters – Definitions are provided on the document "High Utilizers Data Parameters – Apr 2018."
