

**GMC Health Plans**  
**DATA INDICATORS & PROCESS**  
**August 15, 2016**

**Health Plan Data Pull**

Data Parameters:

- Only pull data from Medi-Cal members who were with the plan for the full 2015 Calendar Year (CY).
- Non-pediatric members
- Top 50 members by number of non-primary care encounters over the CY.

From this sample, determine members who had the following during the CY:

- One inpatient stay
- Three or more ED visits
- Any indication of homelessness
- Two or more of the following conditions:
  - Asthma
  - COPD
  - Diabetes
  - Hypertension
  - Congestive heart failure
  - Coronary artery disease
  - Chronic liver disease
  - Dementia
  - Major depressive disorders
  - Bipolar disorder
  - Psychotic disorders (including schizophrenia)
  - Substance use disorders

Will need:

- Assigned medical home
- Complex care management assigned

Post Data Pull Steps:

- Data Summary – Develop and present a summary document noting themes or potential improvement areas. Examples - % are not linked with a medical home, % have mental health diagnoses, % with x number of ED visits, etc.

- Assigned Medical Home – Create data sets for each assigned medical home for their respective members for follow-up.
- County Mental Health Plan – Create a data set with patient name, Medi-Cal number to determine if receiving care within County MH Plan (CY) or current.

Timeline:

- Plan Summary to Sandy Damiano at [damianosa@saccounty.net](mailto:damianosa@saccounty.net) by TBD.
- Data for each Medical Home Provider by TBD.
- Data to County Mental Health Specialty by TBD.
