

RUSCH® QUICKTRACH® Emergency Cricothyrotomy Kit

AT A GLANCE

- Rescue device for failed airways
- Preassembled and ready to use
- Available in two sizes
- Conical plastic cannula with fixation flange and 15 mm connector
- Removable stainless steel cricothyrotomy needle
- Removable safety stopper
- Sterile, single-use, and not manufactured with natural rubber latex

The Rusch® QuickTrach® Cricothyrotomy Kit is an ideal emergency airway device that allows quick and safe ventilation in the presence of acute respiratory distress with upper airway obstruction.

The QuickTrach Cricothyrotomy Kit consists of a pre-assembled emergency cricothyrotomy unit with a 10 mm syringe attached to a padded neck strap and a flexible connecting tube. A removable safety stopper provides a barrier that reduces the chances of perforating the rear wall of the trachea, and the conical needle tip provides the smallest necessary stoma. Tracheal entry can be confirmed by aspirating

air through the syringe. After confirming correct placement, the flexible connecting tube can be used for immediate ventilation.

RUSCH® QUICKTRACH®

Emergency Cricothyrotomy Kit
