

WANTED: COMMUNITY PARTNERS FOR HARM REDUCTION

Harm Reduction Services, a Sacramento health services non-profit agency, seeks community businesses to host our disease prevention program activities in Sacramento County. We need the use of a parking area for two hours per week on an ongoing basis. Activities will include HIV and hepatitis testing, distribution of hygiene and health care products and syringe exchange. All services are legal and endorsed by the Sacramento County health officer. For more information, please contact:

Bob Haras - 916-456-4849.

The program will not create a nuisance to neighbors or customers and will not leave behind any trash. HRS has been conducting this style of outreach in Sacramento city limits for seven years with zero problems. We now wish to include locations in Sacramento County and need the sponsorship of local business people to apply for permission to do so
